

Ekahau ECSE Troubleshooting Lab Kit

In preparation for the training we will send you a small lab kit that you will use during the class. After the class the trainer will unfortunately need it back. Sorry!

To avoid any problems with shipping we would like you to **provide us with your address** so we can send it out well in advance of class start.

Lab kit contains

1 x Pelican case 1150 with padding
1 x MikroTic router + PSU
2 x eth cable
1 x WLANpi tester with USB cable
1 x USB memory card reader

The instructor will send out the an email with a Zoom link and class material a few days before the training date

*After the training the kit is to be returned within 3 days after the training has ended.
This is important as the same kit is circulated to other instructors and their classes.
Please do you best to help us with that.*

Return address

Airwire Aps
Skodsborgvej 18
DK-2830 Virum
DENMARK
Att.: Rene Hinsch

If possible, please create tracking notification to:

Phone: +4540405074
